# Bicycle Safety Tips

## 3-Foot Rule

When passing cyclists, motorists must move into the adjacent lane to the left, if possible. If not, motorists must pass with at least three feet of space between the vehicle and bicycle.

## It's Okay to Ride the Roadways

Bicyclists may leave the bike lane and ride as near to the right side of the street as possible.

## Go With the Flow of Traffic

Follow the rules of the road and ride on the right side of the road in the same direction as traffic. Never ride against traffic.

## Always Wear a Helmet

Helmets should fit so the front is just above the top of the eyebrows.

## Follow the Rules of the Road

\* Obey all traffic signals, stop at stop signs and use hand signals.  
\* Cyclists must follow traffic signals and walk their bike across the street at a crosswalk.

## Use Signals

Be courteous to motorists, use hand or arm signals to let others know what you plan to do.

## Pedestrians Have the Right of Way

Whether riding on streets or trails, cyclists must yield to pedestrians, just like motorists.

## Light Up at Night

A red reflector on the rear of the bicycle and a front lamp with a white light are required for nighttime riding.
