

Purpose

- **The City of Henderson's Open Data Portal is designed specifically to make data:**
 - Accessible
 - Understandable
 - Powerful
 - Usable
 - Sharable/Publishable
- **The Portal also facilitates data-driven decision making, and cross-departmental collaboration. The selected tool has the ability to publish the data sets publicly, privately, and internally**

Pilot

- **The City of Henderson recently completed an Open Data pilot. The purpose of the pilot was to demonstrate the value of Open Data by providing access to the following commonly requested datasets:**
 - Parks, Recreation Centers and Trails with list of amenities
 - Business Licenses
 - Building Permits
 - Demographic Data
 - Crime Data

Open Data Strategic Plan

- **The City is developing its Open Data Strategic Plan which will be a guide for the next phases of Open Data for the City**
 - This will expand the portal to include operating and capital budgets
 - Other data sets will be evaluated and prioritized for possible inclusion in the portal
 - Standards for review of new data sets will be established

BENEFITS

- **Here are some direct impacts we anticipate from Open Data:**
 - Better inform citizens
 - Improve service delivery
 - Increase communications and data sharing
 - Support increased use of data in decision-making
