

Business Impact Analysis and Data Disaster Recovery Strategy

CITY OF HENDERSON

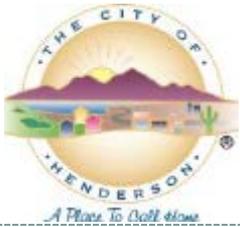

Business Impact Analysis and Data Disaster Recovery Strategy

The City of Henderson (the City) was awarded a grant from the Department of Homeland Security to conduct a Business Impact Analysis and develop Data Disaster Recovery Strategies for the City and the Las Vegas Metropolitan Police Department (Metro). The collaboration between the City and Metro in submitting the request was a primary distinction leading to the selection award.

Business Impact Analysis and Data Disaster Recovery Strategy

The Business Impact Analysis will allow the City and Metro to update their IT disaster recovery strategies to take advantage of the advances in disaster recovery planning and technologies that took place over the last 10 years, and build upon both agency's recently updated Continuity of Operations Plans. Work has begun, and is expected to be completed in January, 2015.
