

Technology and Data Accomplishment

CITY OF HENDERSON

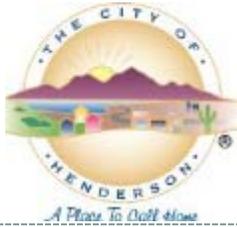

VIDEO CONFERENCING

- **To increase the efficiency and effectiveness of communications between City departments, their remote locations and external partners, video conferencing has been implemented at the City.**
- **Video conferencing has been implemented in nine locations (to start):**
 - Information Technology (1)
 - Police (3)
 - Fire (2)
 - Utility Services (3)
- **Video conferencing supports remote meetings (internal/external), daily briefings, training, and emergency management collaboration.**

VIDEO CONFERENCING

- The solution selected for implementation was Cisco Telepresence which is fully integrated with the City's Cisco Unified Communication Manager.
- Supports voice, video, document presentation and remote camera control. The solution supports scheduled and ad hoc video conferencing for both internal and external use.
- Future uses of this platform include voice, video and document presentation on desktops and mobile devices.
