

## REQUEST FOR QUALIFICATION STATEMENT

The City of Henderson is in search of the most qualified firms to provide professional expertise and services for numerous public works' infrastructure projects that will be needed in the next few years. When selecting firms to provide the planning, design, and/or construction management services for upcoming Public Works Infrastructure projects, the City will utilize pre-qualification lists. The pre-qualification lists will be maintained for a period of three (3) years at which time the qualification statement(s) will be required to be updated unless changes within your company necessitate re-submittal sooner. Our next update will be in January of 2008.

Please note that the City has revised the service categories and will require a new submittal should your firm wish to be considered for upcoming projects. The new service categories are as follows: water infrastructure design and coordination, water pump station(s), water reservoir(s), wastewater infrastructure design and coordination, wastewater lift station(s), transportation design and coordination, structural engineering, traffic engineering, flood control engineering, construction management, geotechnical engineering, local improvement districts, Electrical Engineering, Landscape Architecture, and Bidability/Constructability.

This letter is being sent to your firm as notification to submit qualification statements in accordance with the attached "*Pre-qualification List – Request for Qualifications*" for consideration of inclusion on the City of Henderson prequalification lists as previously discussed.

The City of Henderson looks forward to hearing from your firm. Should you have any questions, please feel free to contact me at 702- 267-3062.

Sincerely,

Jonna Sansom, P.E.  
Engineering Services Manager
