August 24, 2020

FIRE FLOW - ONLINE PERMIT APPLICATION

Our permitting software DSC Online requires applicants to submit a plan set at the time of application for both types of flow permits.

Fire Hydrant (Field) Flow Test (Red Hydrants)
Hydraulically (Computer) Modeled Flow Test (Yellow Hydrants)

- To satisfy that step of the application process add a pdf screen shot of the site map indicating the rough locations of the requested hydrants for testing or showing the major cross-streets of the site location.
- The site map could be generated from an online map service, the civil master utility plan or any other mapping program that is available to you.
